

# GSP-8 User Manual

## Overview

GSP-8 data logger is used to record the temperature/humidity of foods, medicines, chemicals and other materials during storage, transportation and in each stage of their chain including under-bay, cooling points, refrigerators, freezers, showcases, cabinets, laboratories, refrigerators and vehicles.

The logger features a large LCD screen, one button for operation, an internal

temperature sensor, and an external temperature-humidity-combined probe (optional). It supports audiblevisual alarm, two storage modes,

and auto shortens logging interval function during alarms, also for wall

mounting through the holes at the back of logger.

## Specifications

Sensor	Digital temperature humidity sensor
Temperature Measurement Range	Internal sensor: -20~60°C (-4°F~140°F); External probe: -40~85°C (-40°F~185°F) *
Humidity Measurement Range	External probe: 1~99%RH
Temperature Accuracy	±0.3°C/±0.6°F (-20~40°C), ±0.5°C/±0.9°F (others)
Humidity Accuracy	±3%RH (5°C) ±5%RH (others)
Operating Temperature Range	-20~60°C (-4°F~140°F)
Ambient Temperature During power charging	0~40°C (32°F~104°F)
Resolution	0.2°C/°F; 0.1%RH
Memory	Maximum 100,000 points
Logging Interval	10 seconds to 24 hours
LCD ON	15/30/45/60 seconds; always on
Backlight ON	15/30/45/60 seconds; always on
Start Mode	Press button; auto start; timed start

1

Stop Mode	Press button; use software; auto stop
Alarm Thresholds	Configurable; temperature up to 3 high limits and 2 low limits; humidity: 1 high limit and 1 low limit
Alarm Type	Single; cumulative
Alarm Delay	10 seconds to 24 hours
Data Interface	USB
Report Format	Auto PDF report; PDF/EXCEL/TXT** by ElitechLog software
Battery	Rechargeable 1650 mAh battery
Battery Life	Store and use for years (89.5°C and 15 minutes logging interval)
Dimensions	94 x 93 x 29 mm
Weight	173g

\* At ultralow temperature, the LCD is slow but does not affect normal

logging. It will be back to normal after the temperature rises.

\*\*TXT for Windows Only

2

## Operation

### 1. Activate Logger

Pull out the insulator strip from the side of the logger to activate the battery.

### 2. Install Software

Please download and install the free ElitechLog software (macOS and Windows) from Elitech US: [www.elitechus.com](http://www.elitechus.com) or Elitech UK: [www.elitechuk.com](http://www.elitechuk.com)

### 3. Configure Parameters

First, connect the data logger to the computer via USB cable, wait until the icon shows on the LCD, then configure via:

#### EBasic

If you do not need to change the default parameters (in Appendix), please click **Quick Reset** under Summary menu to synchronize local time before usage;

If you need to change the parameters, please click the **Parameter** menu, enter your preferred values, and click the **Save Parameter** button to complete the configuration.

**Warning: For first time user or after battery replacement:**

To avoid losing your new events, please make sure you click **Quick Reset** or **Save Parameter** before going to sync and configure your local time into the logger.

4

<p><b>4. Start Logging</b></p> <p><b>Press Button:</b> Press and hold the button for 5 seconds until the <b>▶</b> icon shows on the LCD, indicating the logger starts logging.</p> <p><b>Auto Start:</b> <b>Immediate Start:</b> The logger starts logging after remove it from the transport box. <b>Timed Start:</b> The logger starts counting after being removed from the computer; it will start logging automatically after the set date/time.</p> <p><b>Note:</b> If the <b>▶</b> icon keeps flashing, it means the logger configured with start delay, it will start logging after the set delay time elapses.</p> <p><b>5. Mark Events</b></p> <p>Double click the button to mark current temperature and time, up to 10 groups of data. After marked, it will be indicated by Log X and SUC on the LCD screen (X means the marked group).</p> <p><b>6. Stop Logging</b></p> <p>Press <b>Button*</b>. Press and hold the button for 5 seconds until the <b>■</b> icon shows on the LCD, indicating the logger stops logging.</p> <p><b>Auto Stop**:</b> When the logging points reach the maximum memory, the logger will stop automatically.</p> <p><b>User Software:</b> Open EtltechLog software, click <b>Summary</b> menu, and <b>Stop Logging</b>.</p> <p><b>Note:</b> *Default stop method is <b>Press Button</b>. If you disabled it, the logger operation would be invalid, please open the EtltechLog software and click <b>Stop Logging</b> button to stop it. **The <b>Auto Stop</b> function will be disabled automatically if you enabled the <b>Circular Logging</b>.</p>	<p><b>7. Download Data</b></p> <p>Connect the data logger to the computer via USB cable, wait until <b>□</b> shows on the LCD screen, then download data.</p> <p><b>Without EtltechLog Software:</b> Simply find and open the removable storage device <b>EtltechLog</b>, save the auto generated PDF report to your computer.</p> <p><b>With EtltechLog software:</b> After the logger auto-upload its data to the EtltechLog software, click <b>Export</b> and select your preferred file format to export. If data failed to auto-upload, please manually click <b>Download</b> and then repeat above operation.</p> <p><b>Note:</b> If the <b>▶</b> icon keeps flashing, it means the logger configured with start delay, it will start logging after the set delay time elapses.</p> <p><b>8. Reuse the Logger</b></p> <p>To reuse a logger, please stopped it first, then connect it to your computer and use EtltechLog software to save or export the data, then re-configure the logger by repeating the operations in <b>2. Configure Parameters</b>. After finished, follow <b>4. Start Logging</b> to restart the logger for new logging.</p> <p><b>Warning!</b> To make space for the new loggings, All previous logging data inside the logger will be deleted after re-configuration. If you forgot to save/export data, please try to locate the logger in the <b>History</b> menu of EtltechLog software.</p> <p><b>9. Repeat Start:</b></p> <p>If you have enabled <b>Repeat Start</b> function*, simply press and hold the button for 5 seconds to quickly restart the stopped logger without any configuration.</p> <p><b>Note:</b> *Repeat Start is disabled by default to prevent data loss caused by re-connection. Please backup data before <b>Repeat Start</b> by repeating <b>7. Download Data</b>.</p>	<p><b>Status Indication</b></p> <p><b>1.
